 Cathedrals

Precision that protects history

Trust in our quality

Heritage projects require special consideration; the best way to restore such buildings is by combining the most accurate and revolutionary products with the right people. Each FuranFlex25 liner is bespoke manufactured, specifically measured and specified for every project to achieve precision.

Over 4000 successful installations in the UK

Insurance backed 25 year guarantee

Diameters up to 1000mm

Over 3 million metres installed in over 29 countries

FuranFlex25.
 Independently tested, certified and CE marked

Minimal disruption

This is achieved by getting installations right first time, thorough in depth surveys including CCTV surveys of the project. Each liner is built specifically for each contract. The unbeatable life of FuranFlex25 and speed of installation add to this.

FuranFlex25 - the original and the best all round flexible lining solution

Product quality

FuranFlex25 products check all the boxes by exceeding building standards. As a customer you can believe in FuranFlex25, which carries a full 25 year guarantee. The product's unique design means there are no joins. This allows flues, pipes and ducts to hit their optimum performance level. FuranFlex25 is only installed by factory trained and certified engineers so you can trust in their professionalism.

Protection of buildings

The unique materials used in FuranFlex25 means that there is limited need to excavate walls to gain access. The revolutionary installation process means it is the cleanest liner to install and minimises the chance of damage and disruption at this crucial stage.

The invisible solution

FuranFlex25 products expand within the flue, pipe or duct to the precise shape of the internal structure. This maintains the authenticity of historical buildings, whilst improving the flow through the chimney, pipe or duct, allowing them to function better than when they were originally built.

Established reputation

FuranFlex25 products have been continually improved and perfected. Since it was first introduced to the European market over a decade ago over 3 million metres have been successfully installed throughout Europe and over 30,000 metres installed in the UK since its introduction.

FuranFlex25 complies with all building regulations

FuranFlex25 has national coverage.

Your closest installer can be found on our website.
