Risk-free solution

FuranFlex offers complete peace of mind with a product which is fully certified and exceeds industry standards.

The original and the best all round flexible lining solutions

Premium quality products

FuranFlex25 and VentilFlex25 check all the boxes by exceeding building standards. As a customer you can believe in these solutions, which carry a 25 year guarantee. The products' unique design means there are no joins, where damage and corrosion can destroy the lining. We only use factory trained experts and specialist installation teams you can trust.

Speed of installation

Installation times vary based on the size of the project, however the timescale usually ranges from 4 hours to a full working day. Ready to use once the installation process is complete.

Technically knowledgeable installers

All our installers are chosen for their integrity, expertise and ability to offer a complete service to the end users, with comprehensive factory training, certification and technical backup to ensure every project runs smoothly, on budget and on time. They are true experts in their field; this means contracts are completed on the first visit and disruption is kept to a minimum.

Low maintenance

Provided they are cleaned at least once a year (depending on fuel used), our liners will maintain their effectiveness throughout their life. However, because of the accurate installation process, potential problems throughout the liners' life are eliminated.

FuranFlex25
 and VentilFlex25
 comply with all
 building regulations

Nationwide network
 of installation teams.
